Interiors

To Whom It May Concern:

Chuck Curlin has served ADW Architects as a Design Engineering Consultant in the areas of mechanical, plumbing, and fire protection for many years. Throughout those years, Mr. Curlin's design team has demonstrated great attention to, and competence in, cost control, quality of work, and schedule compliance in the production of their design documents. Also, we have found that the quality of his design documents and construction administration have been a great asset to us in achieving our goals in the construction process. Among the many projects Mr. Curlin has assisted us with over the years is Fire Station #10, a state of the art facility, and Winner of the Gold Award in the "career category" from Fire Chief Magazine. We could not have been more pleased with Mr. Curlin's work on this project.

It is my pleasure to recommend Chuck Curlin and his design team.

Sincerely,

Jim Powell
