

To Whom It May Concern:

Shultz Engineering Group has worked with Shelco performing design services for mechanical and plumbing as our team member for numerous projects.

We have been pleased with their professionalism and attention to detail. The quality of their design documents is outstanding and that allows us to achieve our goals in the construction process.

They have also been attentive to the aggressive nature of projects in today's market and Shultz Engineering has demonstrated competence in producing documents within allotted timeframes for permitting and coordination purposes. Response time and turn around on submittals have been equally as proficient.

I have recently completed two warehouse projects in Charleston, SC with Billy Austin of Shultz and found that their work both satisfied the owner's outline specifications and our needs by maintaining the overall budget and schedule.

I would definitely recommend Shultz Engineering Group.

Thanks,

David DeBruhl
Shelco, Inc.
Vice President of Preconstruction
