June 21, 2016

To whom this may concern,

Shultz Engineering Group has supported Belk Inc. for many years and they have become our “go-to” mechanical engineering firm. This team works tirelessly to meet our often very challenging demands (on one of our 300 stores, or corporate office). The support provided by Shultz has advanced my organization in not just our mechanical endeavors but our energy and sustainability efforts as well. Shultz Engineering Group takes the time to design, explain the design, and educate my team which translates to deep and overlooked value.

Additionally and more recently, Shultz designed our New Braunfels, TX, Flowood, MS and Franklin, TN stores; all of which went well. They have demonstrated an ability to thoroughly survey existing building systems, understand impacts, and provide effective solutions to deliver comfortable and efficient stores.

Call me should you have any additional questions.

Sincerely,

Matthew Green
